

CEPSA GEL LAVAMANOS

CEPSA GEL LAVAMANOS is a liquid, yellow-coloured product with a pleasant aroma.

Thanks to its cleaning and degreasing power, the CEPSA GEL LAVAMANOS is especially indicated to be used in factories and workshops.

It does not contain abrasives, caustic products or any material that could damage or dry the skin.

It is a biodegradable product.

It is formulated with softeners for conditioning the skin, leaving it smooth and protected.

METHOD OF USE

By means of a dispenser

Push the dispenser once or twice on the hands, rub on the hands and rinse with water

HEALTH & SAFETY AND ENVIRONMENT

Health, safety and environmental information is provided for this product in the Materials Safety Data Sheet. This gives details of potential hazards, precautions and First Aid measures together with environmental effects and disposal of used products.
